

# Instalação VirtualBox 6.1

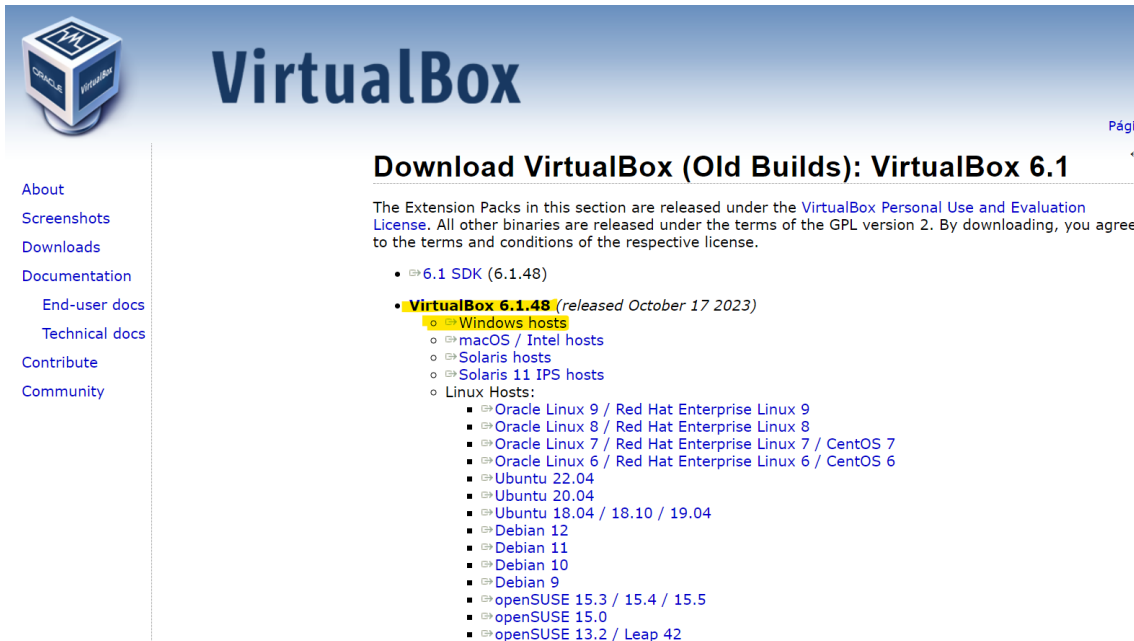

**Passo 1:** Acesse o site: <https://www.virtualbox.org/>

**Passo 2:** Clique em Download e depois no link “VirtualBox 6.1 builds”.

The screenshot shows the VirtualBox website homepage. On the left is a sidebar with links: About, Screenshots, Downloads (highlighted in yellow), Documentation, End-user docs, Technical docs, Contribute, and Community. The main content area has the VirtualBox logo at the top. Below it is the section "Download VirtualBox". The text says: "Here you will find links to VirtualBox binaries and its source code." followed by "VirtualBox binaries". It states: "By downloading, you agree to the terms and conditions of the respective license." and "If you're looking for the latest VirtualBox 6.1 packages, see VirtualBox 6.1 builds. Version 6.1 will remain supported until December 2023." Below this is "VirtualBox 7.0.12 platform packages" with a list of links: Windows hosts, macOS / Intel hosts, Linux distributions, Solaris hosts, and Solaris 11 IPS hosts. At the bottom, it says: "The binaries are released under the terms of the GPL version 3."

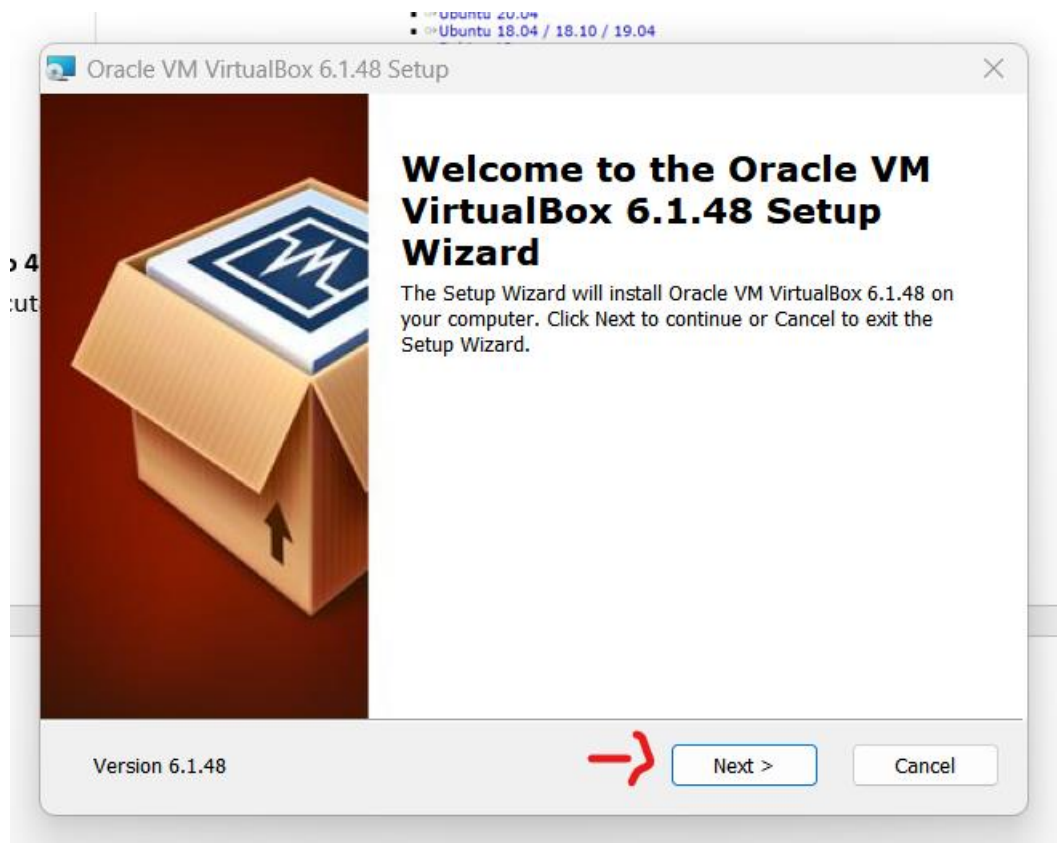

**Passo 3:** Escolha o seu sistema operacional e faça o download do arquivo.

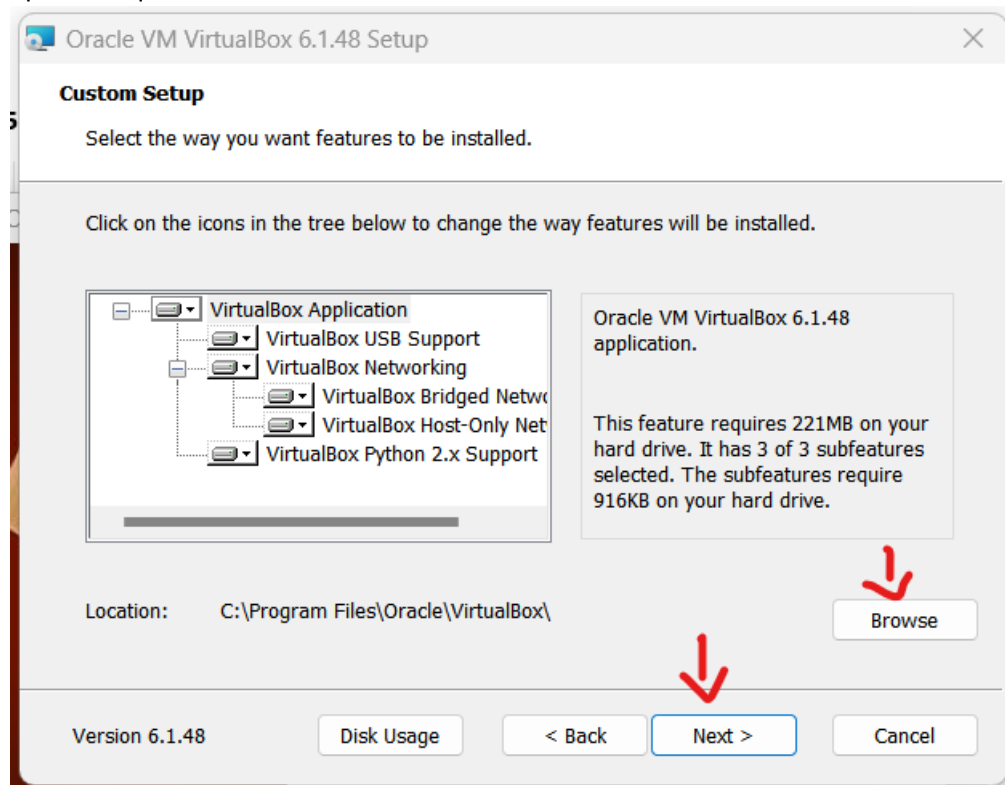

The screenshot shows the "Download VirtualBox (Old Builds): VirtualBox 6.1" page. The sidebar is the same as the previous page. The main content area has the title "Download VirtualBox (Old Builds): VirtualBox 6.1". Below it, it says: "The Extension Packs in this section are released under the VirtualBox Personal Use and Evaluation License. All other binaries are released under the terms of the GPL version 2. By downloading, you agree to the terms and conditions of the respective license." The list of builds includes: 6.1 SDK (6.1.48) and VirtualBox 6.1.48 (released October 17 2023). Under VirtualBox 6.1.48, there are links for Windows hosts, macOS / Intel hosts, Solaris hosts, Solaris 11 IPS hosts, and Linux Hosts. The Linux Hosts section lists various operating systems and versions, including Oracle Linux, Red Hat Enterprise Linux, CentOS, Ubuntu, Debian, and openSUSE.

**Passo 4:** Clique com o botão direito do mouse sobre o arquivo baixado e clique na opção “executar como Administrador”.

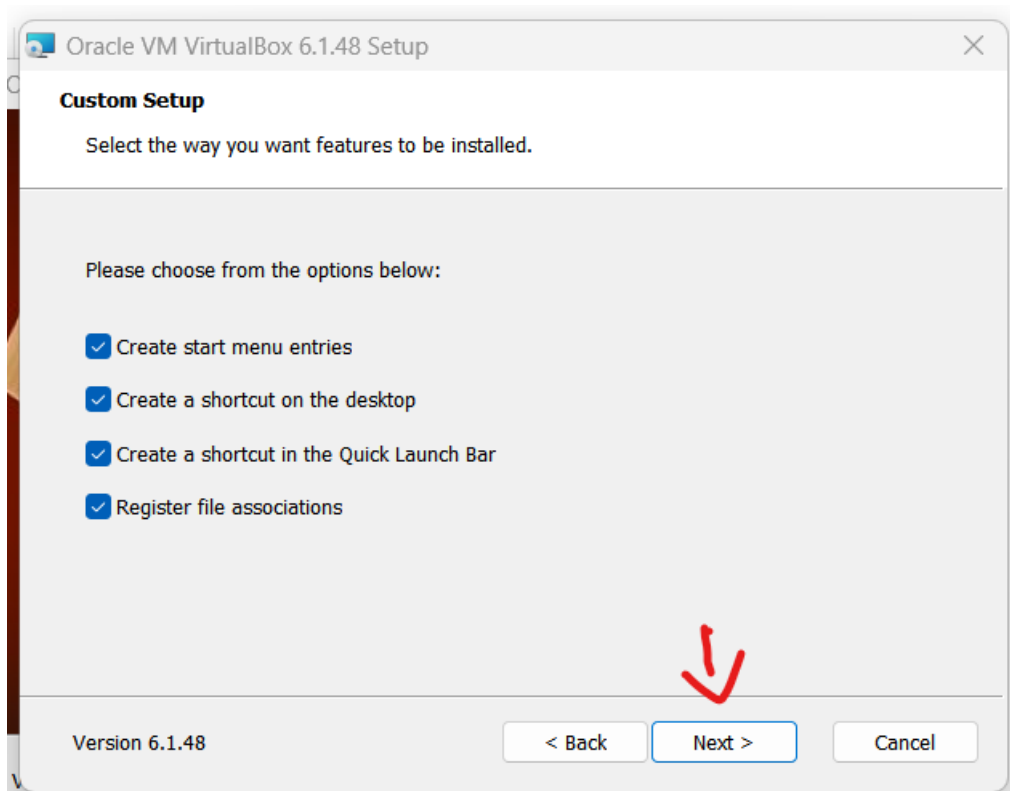

**Passo 5:** Clique em “Next”

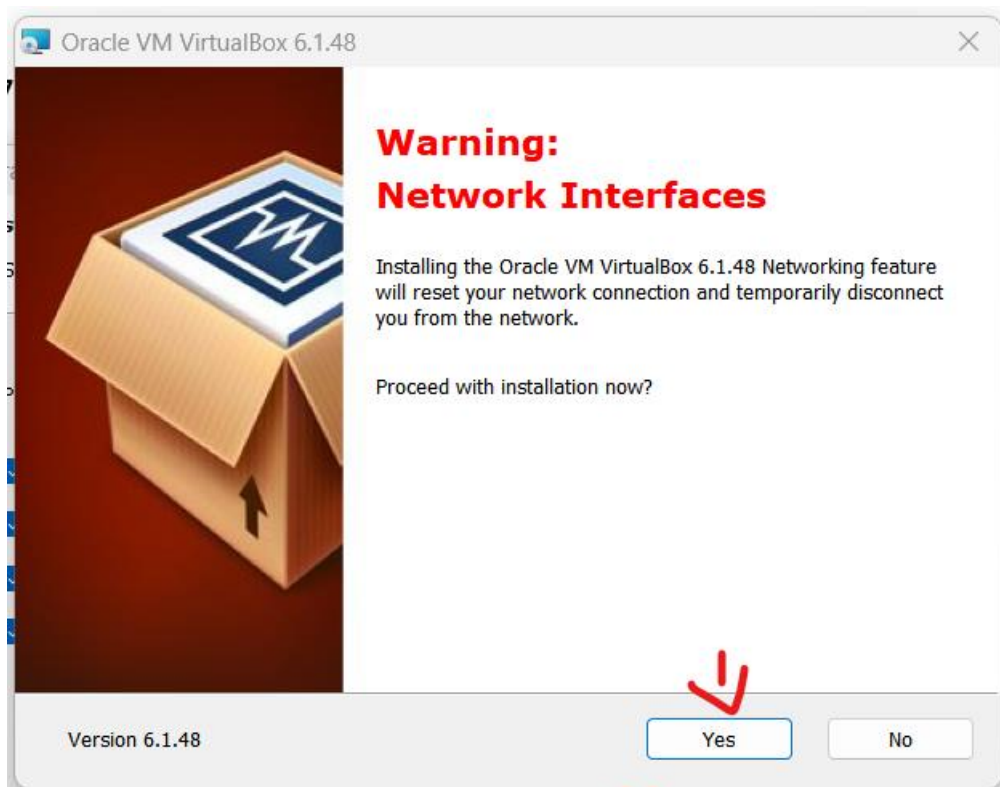

**Passo 6:** Caso queira mudar o local de instalação do VirtualBox, clique em “Browse”. Caso não, apenas clique em “Next”.

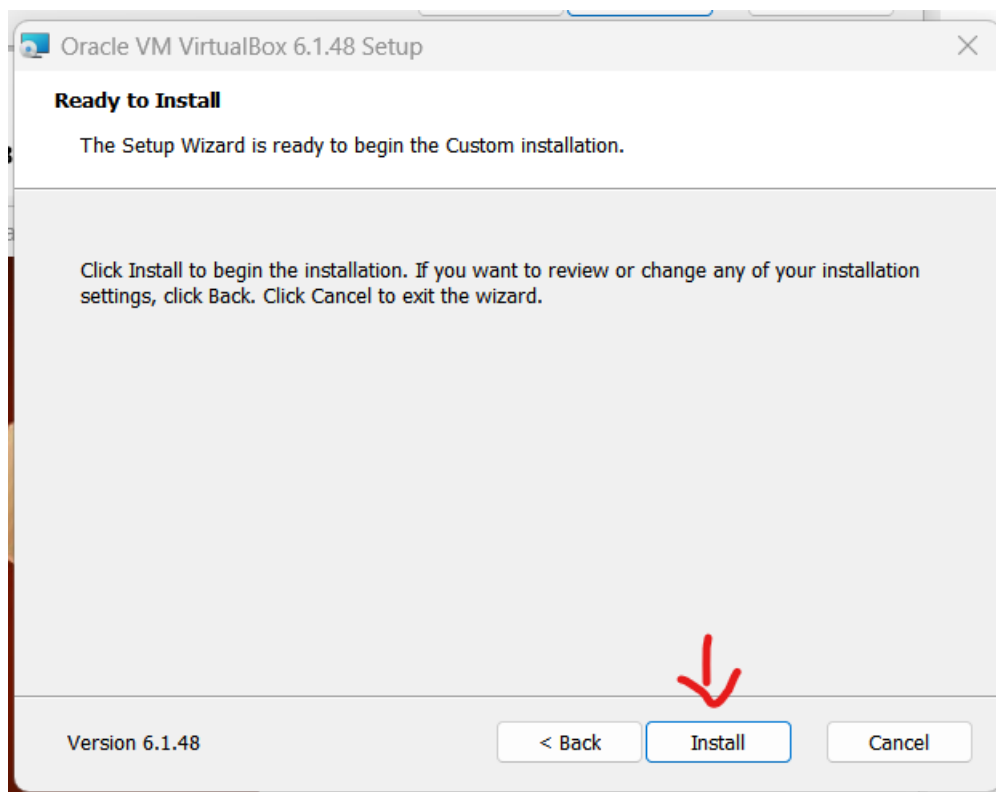

**Passo 7:** Clique em “Next”

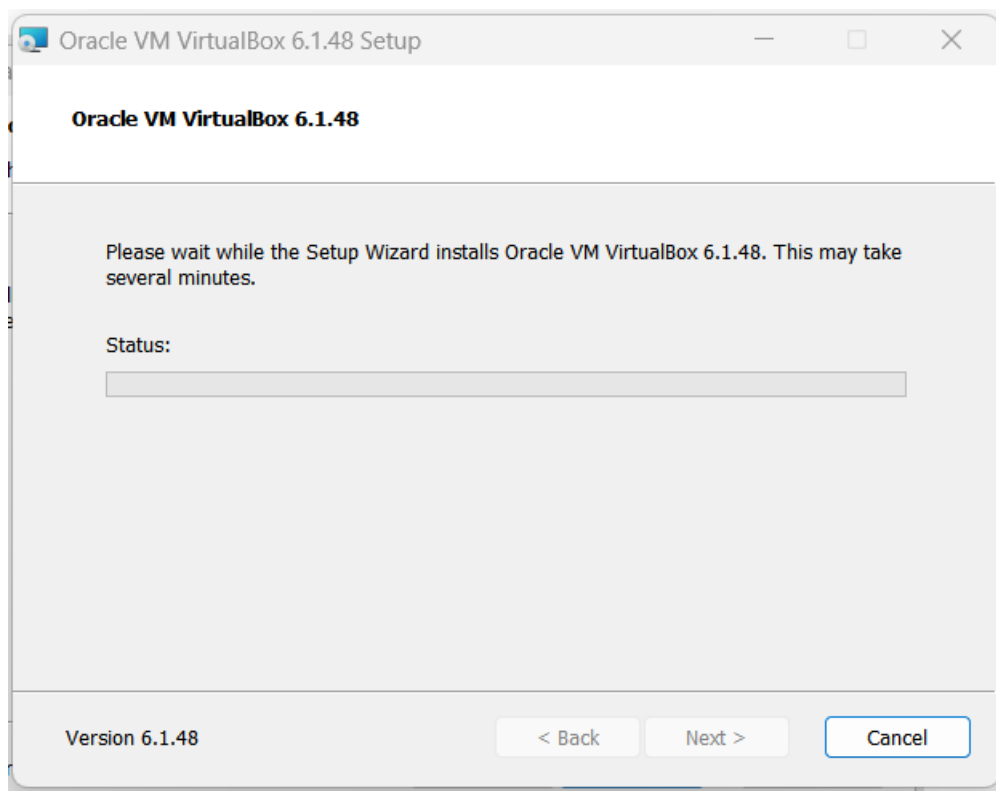

**Passo 8:** Clique em “Yes”.

**Passo 9:** Clique em “Install”

**Passo 10:** Aguarde a instalação.

**Passo 11:** Clique em “Finish”.

**Passo 12:** De duplo clique no ícone gerado pela instalação para executar o VirtualBox.
